

For more than 40 years, the Five Star Equipment name has represented a dedicated team of professionals who partner with the construction and forestry communities. Today, Five Star Equipment continues this commitment and is focused on its Vision, Mission and Values:

OUR VISION

To be the leading dealer in the markets we serve and our customers' first choice for their equipment needs.

OUR MISSION

At Five Star Equipment, we power our customers' success through our dedicated and knowledgeable team, our quality products and our focus on customer service.

OUR VALUES

CUSTOMER FOCUS

We succeed through long-term partnerships with satisfied customers.

INTEGRITY

We are honest, respectful and fair in dealing with customers, employees and suppliers.

ACCOUNTABILITY

We deliver on our commitments and are accountable for our actions and results.

TEAMWORK

Our competitive advantage is our team and we achieve more by working together toward common goals.

EXCELLENCE

We drive and embrace change and are committed to improving every day.

TOPCON

TOPCON CONSTRUCTION SOLUTIONS

From breaking ground to final inspection, Topcon's leading edge construction solutions give you the tools to be more efficient, improve your accuracy and better manage your data, machines and crew.

WORK FASTER

Topcon combines technology innovations to provide you with unparalleled speed and productivity gains. Start sooner, get to grade faster, and eliminate rework.

WORK LEANER

Knowledge is power. Every crew member and machine on site can do more with the visibility and ease of use that Topcon solutions provide.

BE READY TO SCALE

Choosing Topcon lets you take on bigger jobs with greater profitability. Or get more jobs done in a year. Topcon construction solutions can mean your ticket to growth!

2D MACHINE CONTROL SOLUTIONS:

- Rotating lasers and pipe lasers
- Topcon System 5
- X52 Series Excavator Systems
- Laser receivers

3D MACHINE CONTROL SOLUTIONS:

- 3DMC² Dozer Fast, efficient machine control for dozers
- 3DMC² Grader Fast, efficient machine control for graders
- 3DMC^{MAX} Integrated 3D mastless dozer system
- X53 Series 3D Excavator Systems
- Sitelink 3D Enterprise Real-time site management

GRADE MANAGEMENT SOLUTIONS:

- Hyper VR base/rovers
- Pocket 3D
- Topcon field computers

SMARTGRADE™ BY JOHN DEERE

Five Star Equipment offers grade control technology solutions through John Deere's industry-leading SmartGrade Crawler Dozers, Excavators and Motor Graders.

Grade control technology is a must-have tool for maximizing productivity and maintaining a competitive edge. John Deere offers three grade control technologies: SmartGrade, Grade Guidance and Slope Control. Machines with these systems are fully integrated from the factory, arriving at your jobsite ready to work. With no external mast, cables, or GNSS receivers to install and remove, operators can focus on the grading job at hand instead of on tedious daily maintenance. Each of these systems is fully supported by Five Star Equipment's SmartSite team.

CRAWLER DOZERS AND MOTOR GRADERS

FULL 3D GRADE CONTROL INTEGRATION

- Featuring Topcon 3D-MC²
- No external masts or cables
- Reduce risk of damage and theft
- Eliminates system installation time

CRAWLER DOZERS

Optional SmartGrade ready with Slope Control will be available on select K- and L-Series crawler dozers, making grading easier by automatically maintaining the blade angle without the need for an external laser or GPS reference.

MOTOR GRADERS

The SmartGrade ready GP-Series motor graders feature standard Cross Slope, which makes it easier to maintain a consistent slope by automatically controlling one side of the blade.

AUTO SMARTGRADE

Select new load levels, dozing activities, and material types in two monitor touches versus system calibration by a GPS expert. Automatically adjusts blade when encountering heavier loads, reducing track slip to improve fuel economy and prolong track life.

EXCAVATOR GRADE GUIDANCE OPTIONS

Factory-installed grade guidance is available on select G-Series Excavators to boost efficiency on your jobsite. Many G-Series Excavators can also be ordered with optional mounting points on link, arm, boom, upper structure and counterweight for grade reference system sensors of your choice.

SMARTGRADE EXCAVATORS

Automatic hydraulic controls.
